

**SPEED + PERFORMANCE**

# BIO FILM BAG MANUFACTURER

**FLEXIBLE PLA FILM**

## AVIENT SOLUTION

CESA™ & OnCap™ BIO ABSL additives

## WHY AVIENT?

- Provided a solution to minimize film-to-film surface contact, decreasing the coefficient of friction between layers lying on top of each other
- Created a customized formulation by mixing anti-blocking additives and slip agents, maintaining process speed without impacting performance or film quality
- Improved handling of the PLA shopping bags, making them easier to open

## LEARN MORE

## KEY REQUIREMENTS

- Easy film unwinding without optical impairments or mechanical damage
- Excellent clarity and transparency in BOPLA applications
- Compliant with food contact applications\*
